

AdipoLife™ DfKt™-1 Adipogenesis Medium Specification Sheet

AdipoLife DfKt-1 Adipogenesis Medium

AdipoLife is a new medium optimized for the differentiation of Human Adipose-derived Mesenchymal Stem Cells (HMSC-Ad) and Pre-Adipocytes (HMSC- Pre-Adipocytes) into adipocytes.

AdipoLife Basal Medium contains no antimicrobials and no phenol red. Antimicrobials are not required, but are recommended during differentiation due to the duration of culture and the frequency of handling of the cultures. Antimicrobials and phenol red may be purchased separately from Lifeline.

AdipoLife Medium Components

AdipoLife is offered in a kit format composed of basal medium and associated supplements and differentiation factors called "DiffFactors." This kit allows you to prepare fresh medium in your laboratory, extending shelf life and enhancing performance. AdipoLife Basal Medium is provided in a 100 mL bottle. The remaining DiffFactors (growth factors and supplements) are packaged in a convenient gas-impermeable pouch for easy storage.

Quality Testing for Guaranteed Consistency and Reproducible Results

Lifeline Cell Technology manufactures products using the highest quality raw materials and incorporates ISO style quality assurance in every production run. Exacting standards and production procedures ensure lot-to-lot consistency. Every production lot of AdipoLife™ DfKt™-1 Adipogenesis Medium is extensively tested using Human Mesenchymal Stem Cells-Adipose.

- Sterility Testing Negative for bacteria and fungal growth
- pH 7.6 +/- 0.3
- Cell Testing Rate of proliferation and morphology
- Osmolality 255 +/- 15 mOsm
- Endotoxin < 0.5 EU/mL

AdipoLife DfKt-1 Adipogenesis Medium differentiates HMSC-Ad, and HMSC-Pre-Adipocytes into adipocytes. In comparisons with commercially available medium, AdipoLife DfKt-1 shows superior efficiency of differentiation as is demonstrated by the greater accumulation of lipid vesicles.
